Our 80x80cm porcelain tiles are both adaptable and stunning, transforming the design and architecture industry by offering new possibilities for tile usage that were once inconceivable.

All tiles are created for use on floors and furniture, offering versatility and excellent technical and aesthetic quality.

Floor

The best way to realize the limitless potential of the flooring is through the application on the ground, which showcases its stunning beauty and durability under pressure.

Furniture

Perfect for adding sophistication to contemporary areas, stylish tables and living room furnishings. Select your preferred interior design to establish a cohesive setting. Marble, stone, and concrete seamlessly blend into the interior design without sacrificing anything.

Focused on ceramics' expertise

Nika Naghsh Iranian is a gres porcelain wall and floor tile manufacturer located in Esfahan, Iran. It has a capacity of 4.0 million square meters of production a year utilizing state-of-the-art machinery. Founded in 2016 and headquartered in Tehran, Iran, Nika Naghsh Iranian serves clientele in more than 20 countries while employing 400 valued employees.

Forged in the mountains of Ras Al Khaimah

The RAK Ceramics brand was established in Ras Al Khaimah in 1989 by H.H. Sheikh Saud Bin Saqr Al Qasimi, member of the Supreme Council and Ruler of Ras Al Khaimah, who aspired to have the best machinery, latest technology, and to produce the best products possible for sale in the world.

Now under the vision and leadership of Sheikh Khalid Bin Saud Al Qasimi, Chairman of RAK Ceramics, the company has enjoyed rapid growth becoming an industry leader in just 30 years while finding its own roots in Iran with its local partner, Nika Naghsh Iranian.

Innovation and wide range

Innovation is the heart of Nika Naghsh Iranians' philosophy and the company is a pioneer in introducing hi-tech innovations that are a breakthrough in the industry and a world leader in the production of porcelain tiles ideal for use of indoor & outdoor spaces for wall and floor coverings for residential, retail and industrial projects.

A wide range of technologies are used at its state-of-the-art plant including advanced digital printing technology for industrial decoration & effects, double charged feeding systems, digital soluble salts, and other advanced technologies. Nika Naghsh Iranian is known for its wide product range and for its ability to produce bespoke ranges for both small and large scale projects, enabling its clients to bring their ideas to life while having unlimited flexibility.

Quality makes us different

Nika Naghsh Iranian adheres to the RAK Ceramics standard protocols which includes the distinction of being the first company in the UAE to be awarded with ISO 9001 certification by internationally recognized UK certification body “CICS” (Ceramic Research Institute Certification Scheme) for ceramics tiles and sanitary wares. Furthermore, Bureau Veritas Certifications verifies the implementation of RAK Ceramics’ quality management system and has certified the company’s compliance with the requirements of ISO 9001:2015 with the scope covering the design, development, production and supply of ceramics and porcelain floor and wall tiles, slabs and vitreous china sanitary wares. Nika Naghsh Iranian also follows local Iranian standard requirements which are based on ISO certification standards. Finally, Nika Naghsh Iranian also holds CE certification.

A track record of expertise

Nika Naghsh Iranians' products are proudly featured in some of the most prominent building projects in Iran and around the world. From the Atiyeh 2 Hospital project to the Citadium Shopping Centre, the list goes on all throughout Iran and the world.

The Company'

Nika Naghsh Iranian is one of the leading premium ceramic manufacturing plants based in Iran. Its vision is to deliver the highest standards of quality while maintaining its up-to-date research and development protocols. The result is products that are always one step ahead in the industry while satisfying a broad range of customer requirements.

Nika Naghsh Iranian is home to several brands including PVRE Ceramics which is centered on going back to the roots of the ceramic industry and inspiring customers with the essence of ceramics. This is proudly done with our experienced team of 400 personnel split between our factory located in Esfahan, Iran and our headquarters in Tehran, Iran.

Today Nika Naghsh Iranian has the capacity to produce approximately 4,000,000 square meters of product in two sizes (60x60, 60x120) across a variety of product types: glazed polished porcelain, full body porcelain and double charge all of which are available in both matte and polished format.

Nika Naghsh Iranian will continue delivering with its essence of ceramics experience while pushing the boundaries both in terms of quality and technical innovation for many years to come.

CONCRETE

Concrete

The ultimate expression of minimalism

RAK Ceramics concrete collection makes a powerful statement with its sheer simplicity. No fuss, no frills, just pure perfection. With its neutral colour and natural texture, the concrete-look tiles are the ideal choice in creating a minimalist look and feel.

It is a versatile collection that suits well with any settings, either with a contemporary or minimalist mood, or in residential contexts or contract industry.

STONE

Stone

No better way to create a relaxing environment

RAK Ceramics reinterprets the ancestral charm of stone and transforms it to one of the most preferred material in contemporary architecture.

Solid, durable and extremely versatile, the stone-look tiles have special features and highly attractive visual impact. A traditional mood that is able to define interior design projects with a modern appeal.

RAK Ceramics' stone collection is inspired by various types of stone existing in nature and is the ideal choice to create a particularly welcoming atmosphere that suits a sophisticated environment, giving a sensation of wellness and relaxation.

PRODUCT GUIDE TECHNICAL FEATURES

GLAZED PORCELAIN TILES (Bla) :

Glazed porcelain tiles are manufactured using pure, selectively imported raw materials mixed using the most advanced extraction and sorting techniques; they are obtained with a production process similar to that of single-fired tiles. The resulting product is top-quality porcelain tile, obtained by raw materials wet grinding, followed by partial drying by spraying, silo storage to allow homogenization of properties, and pressing with highly efficient hydraulic presses up to specific pressures more than 500 kg/cm2. The high pressure combined with high firing temperature exceeding 1200 °C results in highly compact & strong ceramic surface with very low water absorption (lower than 0.1% according to UNI EN ISO 10545-3) and extremely high mechanical resistance (average value exceeding 50 N/mm2 according to UNI EN ISO 10545-4). Thanks to their low porosity, these glazed porcelain tiles are frost-proof and rated as belonging to the Bla GL class according to the European Standard UNI EN 14411 which requires water absorption ≤ 0.5%. The wear strength may change according to the glaze used. The MoR (modulus of rupture) in accordance with UNI EN ISO 10545-4 results to 50 N/mm2 while the required value is 35 N/mm2. RAK Ceramics glazed porcelain tiles are available in a wide range of designs, Sizes and Finishes.

ADVICE ON LAYING

Although our glazed porcelain tiles can be installed using traditional cement mortars, we advise using modern adhesives. While installing on wall, the two-layer spreading system is recommended to perfectly wet the back of the tile. Quickly dipping each tile in water before installation will remove any dust on the back of the tile for perfect adhesion. Do not wet the tiles if you are using vinyl, acrylic resin adhesives or two-component organic-solvent based adhesive. It is advisable to incorporate suitable shrinkage - flexion joints (movement/ expansion joints) when installing on large floors: the joints should never be spaced more than 4 - 5 linear meters apart indoors and 3 linear meters apart outdoors. Be careful while using strong coloured grouts as they might leave stains on the surface of the tiles that may be difficult to remove later.

TECHNICAL CHARACTERISTICS - GLAZED PORCELAIN TILES (BIa)

	Test Description	Standard Test Method	International Standard ISO 13006	
	Length & Width	BS EN ISO 10545-2	+/- 0.6%	+/- 0.3%

	Resistance to Thermal Shock	BS EN ISO 10545-9	No visible defect	No visible defect
	Crazing Resistance	BS EN ISO 10545-11	No crazing	No crazing
	Frost Resistance	BS EN ISO 10545-12	No visible damage	No visible damage
	Resistance to chemicals	BS EN ISO 10545-13	No visible defect	No visible defect
	Resistance to stains	BS EN ISO 10545-14	Manufacturer to state class	Stain removed Min. class 4
	Colour Resistance to UV Light	DIN 51094	No change in color	No change in color

Note : Shade variation across the batches is inherent to the manufacturing process and the pre-laying colour comparison is recommended.

UNGLAZED PORCELAIN TILES (BIa) :

The Unglazed porcelain tiles are manufactured using pure, selectively imported raw materials mixed using the most advanced extraction and sorting techniques; they are obtained with a production process similar to that of single-fired tiles.

The resulting product is top-quality porcelain tile, obtained by raw materials wet grinding, followed by partial drying by spraying, silo storage to allow homogenization of properties, and pressing with highly efficient hydraulic presses up to specific pressures more than 500 kg/cm2. The high pressure combined with high firing temperature exceeding 1200 °C results in highly compact & strong ceramic surface with very low water absorption (lower than 0.1% according to UNI EN ISO 10545-3) and extremely high mechanical resistance (average value exceeding 50 N/mm2 according to UNI EN ISO

Unglazed tiles are full body products suitable for heavy traffic areas as they are characterized by a deep abrasion resistance (equal to 140 mm3 of removed material, as opposed to the 175 mm3 provided for by the UNI EN ISO 10545-6 standard).

Thanks to their low porosity, these glazed porcelain tiles are frost-proof and rated as belonging to the BIa UGL class according to the European Standard UNI EN 14411 which requires water absorption ≤ 0.5%.

Chemical acid and base resistance (UNI EN ISO 10545-13) makes unglazed porcelain tiles suitable for environments where aggressive chemicals are used, e.g. food processing factories, hospitals, chemical or pharmaceutical plants. The unglazed porcelain tiles are available in a wide range of Sizesand surfaces (slip-resistant finish also available).

ADVICE ON LAYING

Although our glazed porcelain tiles can be installed using traditional cement mortars, we advise using modern adhesives. For large Sizes over 40x40cm, outdoor and wall installations, the two-layer spreading system is recommended to perfectly wet the back of the tile.

Quickly dipping each tile in water before installation will remove any dust on the back of the tile for perfect adhesion. Do not wet the tiles if you are using vinyl, acrylic resin adhesives or two-component organic-solvent based adhesive.

It is advisable to incorporate suitable shrinkage - flexion joints (movement/ ansion joints) when installing on large floors: the joints should never be spaced more than 4 - 5 linear meters apart indoors and 3 linear meters apart outdoors. Be careful while using strong coloured grouts as they might leave stains on the surface of the tiles that may be difficult to remove later.
